3D SCANNING FOR PROFESSIONALS

3D SCANNING WITH TPK & POLYGA

Let our team at TPK provide you with the most advanced 3D inspection and reverse engineering services on the market today. We have vast experience as integrators in quality control and reverse engineering applications.

INTEGRATION

Whatever your area of expertise happens to be, we have a solution for you. TPK will tailor a system that fits your needs as a customer & advances your capabilities as a creator.

SCANNING SOFTWARE

Your 3D scanner needs the right software to get you started. Trust Polyga's range of software for your reverse-engineering projects, quality control, and anything else you can dream up.

VERSATILE & ACCURATE

Start 3D scanning in no time! Polyga scanners are ready to take 3D scans of real-world objects with the click of a button, capturing millions of surface measurement points accurately only minutes after setup.
