TPK NOW OFFERS VOIP, DOOR ACCESS, & SECURITY CAMERA SOLUTIONS

As of July 5th, 2022, Turnpike Controls now offers solutions for business VoIP, door access controls, and security/surveillance cameras! It was hard work to get to this point, but

we now partner as vendors with both Sangoma Systems and ADI Global to provide these solutions to our business customers.

Whether it is a 20-phone VoIP system you require for your business, or a single-camera surveillance system to keep an eye on your office space, or a 10,000 square foot warehouse that requires electronic door access controls at all entrances, we can now do all of that and more. ■

We purchased a 40' trailer from a local dealer, and we have transformed it completely into a mobile command center/storage bin/parts inventory for our technicians!

The trailer will be able to travel wherever we need it to go around the country, and we can bring it to the job site on our own time and secure it when we are not present. ■

POLYGA RELEASES NEW HI-SPEED 3D SCANNER

We're excited to pass along the news from our 3D scanner partner Polyga, that they have just released their first high-res 3D camera!

From the Polyga website: "Designed for industry, the **Vision V1** can be easily mounted onto robotic arms and assembly lines. It's ready for automated applications anytime with plug-and-play connectivity. The sensor's compact size allows it to be integrated anywhere."

Contact TPK for more info! ■
